PROFESSIONAL SUMMARY

AI/ML Developer with hands-on experience in machine learning, deep learning, NLP, LLMs, and computer vision. Skilled at building and deploying end-to-end AI pipelines, agentic AI systems, and RAG-based applications. Delivered production tools with measurable results, including 94% prediction accuracy and 40% efficiency gains. Experienced across the full ML lifecycle, from model training and fine-tuning to API integration and deployment. Strong foundation in Python, FastAPI, and cloud-based MLOps workflows.

TECHNICAL SKILLS

Languages: Python, SQL

ML/DL: TensorFlow, PyTorch, Keras, scikit-learn, XGBoost, LightGBM, Feature Engineering, Hyperparameter Tuning

Generative AI & LLMs: LLM Integration, Prompt Engineering, RAG, LangChain, Hugging Face, OpenAI API, Groq

NLP & CV: NLP, OCR, NER, Text Classification, Sentiment Analysis, Computer Vision

MLOps & Cloud: FastAPI, REST APIs, MLflow, AWS, Azure ML, MongoDB, Git, Docker

PROJECTS

NeuroBrowse | *Autonomous Browser Agent (Groq + Playwright)* | Apr 2026

- Built an autonomous AI agent using LLaMA 3.3-70B and Playwright, automating multi-step browser tasks directly from natural language instructions with zero manual input.
- Applied chain-of-thought reasoning, DOM-aware element targeting, and stuck-loop recovery for reliable execution across dynamic, unpredictable web pages.
- Open-sourced on GitHub, showcasing scalable agentic AI architecture, prompt engineering, and production-grade software design suited for real-world deployment.

Health Guardian | *AI-Powered Disease Prediction & OCR-Based Healthcare Chatbot* | Feb 2026

- Trained CNN and ensemble models (Random Forest, Gradient Boosting) for multi-class disease prediction, reaching 94% accuracy through feature engineering and tuning.
- Built an OCR-NLP pipeline with computer vision and NER to extract medication names, dosages, and frequencies at 91% accuracy.
- Shipped a healthcare chatbot combining LLM reasoning, ML inference, and OCR modules, cutting diagnosis response time by 30%.

PROFESSIONAL EXPERIENCE

Iconic Hub | AI/LLM Developer | February 2026–May 2026

- Built a FastAPI backend integrating Groq LLMs with streaming inference, PDF ingestion, and document retrieval for an EdTech platform.
- Automated grading using LLM-based question generation and semantic similarity scoring, boosting efficiency by 40% over a 4-month tenure.
- Shipped SSE streaming, multilingual NLP support, and concurrent request handling using async Python and REST API best practices in production.

EDUCATION

B.Tech in Artificial Intelligence and Data Science

Anand Institute of Higher Technology | 2023–Present | CGPA: 8.95/10

CERTIFICATIONS

- Introduction to Responsible AI – Google Cloud (2025)
- Database Management System – MongoDB (2025)
- Fundamentals of Machine Learning and Artificial Intelligence – AWS (2025)
- Foundations of Prompt Engineering – AWS (2025)
- Data Analytics with Machine Learning – Deloitte (2026)
